SUMMARY

Resourceful Web Developer with experience in building and maintaining robust REST APIs using Go and Node.js. Proven ability to design and optimize databases (SQL and NoSQL), implement caching, and manage CI/CD pipelines with Docker and Jenkins. Adept at collaborating with frontend teams to ensure seamless data flow and deliver business-compliant solutions. Seeking to leverage expertise to drive innovation and efficiency at your organization.

WORK EXPERIENCE

09/2025 - 09/2026	Backend Developer PT. Zen Multimedia Indonesia - Engineered and sustained REST APIs leveraging Go and Node.js. - Architected and refined database schemas utilizing relational (PostgreSQL, MySQL) and NoSQL (MongoDB) systems. - Boosted API performance through the integration of caching mechanisms and message brokers, including Redis and Kafka. - Administered deployment processes and CI/CD pipelines employing DevOps tools such as Docker, Jenkins, and Portainer. - Partnered with frontend development teams and stakeholders to ensure fluid data interchange, synchronize feature specifications, and deliver business and regulatory compliant solutions.	Purwakarta, Indonesia
02/2025 - 05/2025	Cyber Security Intern Diskominfo Cimahi - Investigated ethical hacking methodologies within the CISCO security framework. - Collaborated with a team to identify SEO-based cyberattacks targeting the city's official website. - Executed a Vulnerability Assessment on the Cimahi City Government Website.	Cimahi, Indonesia
02/2024 - 06/2024	Data Protection Officer Intern IPT. Gama Multi Usaha Mandiri - Acquired practical experience in data protection protocols within cloud computing environments. - Assisted IT teams in evaluating and fortifying system vulnerabilities. - Developed an understanding of how to ensure organizational compliance with data protection legislation.	Yogyakarta, Indonesia
